

The Miner.

FRIDAY AUGUST 21 1877.

Official Paper of Yavapai County.
C. W. Chase, Editor.
Published for the Proprietor by J. H. Chase.
Subscription price, \$1.00 per annum in advance.
Single copies, 5 cents.
Advertisements, by the square, per week, 10 cents.
Business notices, by the line, per week, 5 cents.
Obituary notices, by the line, per week, 5 cents.
Legal notices, by the line, per week, 5 cents.
All communications should be addressed to the Editor.

KANSAS PACIFIC RAILWAY.

Today we present our readers with an advertisement of this enterprise, which has its line of route from the borders of our sister State, New Mexico, and its line surveyed into the very heart of Arizona, where their line is well known to be heard at no distant day, as it comes along puffing and steaming in the advance of a long train of cars loaded with the choicest goods of the various markets, supplying the merchants, farmers and others with everything they need at about the same figure they can be purchased for in the eastern market at retail, and when the owners of this great thoroughfare, who are clear-sighted and far-seeing, have tapped our silver mines and loaded us with iron from our own friends in the Atlantic, we do not expect them to stop, but confidently believe they will press on to the rich shores of Old Mexico, and in the waters of the Gulf, and that they will hold the key to a magnificent market, whereby they may control a large trade with China, Japan and the Orient.

Two tales from New York, Philadelphia, St. Louis and the large cities of the East will not exceed three cents in currency to the present terms of the road, El Moro, or, if preferable, to Fort Garland, then can be added five cents for wagon transportation and you have a grand total of eight cents per pound, just the amount one good fast (if freighters) charged to from El Moro, a few days' drive on a small lot of printing material, the distance being in the neighborhood of 150 miles. By purchasing in the Eastern market our merchants concede that a saving can be made of 20 per cent. on the difference in price between that market and the San Francisco market.

With a few thousand dollars expended on the Mesquite range of mountains, a distance of 20 miles, it being the only barrier, we would have as good a road as can be found in any country and adaptable to cattle as well as mule teams. Gen. Kautz, the Commander of the Department, has just gone over the route and will have an eye open with a view to calculating the amount of labor necessary to build it, whereby the rough place of road stretching across the Mesquites may be made possible for all kinds of freight, and will, undoubtedly, on his return give a helping hand towards opening up this much needed outlet from Arizona to the present terminus of the Kansas Pacific.

We have all felt the powerful hand of the greatest monopoly of the day within the United States—the Southern Pacific Railroad, who put their tariff to suit their own ideas, with gold coin as their standard. We are receiving nearly every ounce of our supplies through this unduly channel, and the sooner we rid ourselves of the scourge the better off we will be. Prior to the railroads tapping our Southern mines, we were doing just as well as we could, but since they have come, they have put us in a position where we can only move at a snail's pace. They have no love for Arizona or her people. They do not spend a cent for anything we have, and we should wonder whether they even take a newspaper printed in the Territory, and as for advertising, that is not the question, they are too generous, contemptible. It is the contrary with our friends from the East, they advertise what they propose to do, and if living prices, also subscribe for the Arizona papers, and in all their acts have a semblance of gentlemen who want to do the fair thing.

Our Territory is fast growing in importance, and the amount of merchandise and supplies that will be needed for the civil and military will be so great that the amount, and is well worth a struggle to obtain and control. It is to be noted that General Freight, Agent of the Kansas Pacific, Mr. Muir, has taken the view of this important matter, and his freight bill will be accepted as a satisfactory one.

THE WAR.

The Turkish army has made a junction, and the general impression is now, that early in the coming month the greatest battle yet fought in the Ottoman empire will come off. The Russians who have been concentrating in several divisions, and have been fighting in the Caucasus, are now moving towards the Turkish army, and are expected to make a decisive move, and to crush the Turkish troops, and to take the city of Constantinople. The Turkish army is now in a position to defend the city, and is expected to make a desperate stand. The battle is expected to be a long and hard one, and will decide the fate of the Ottoman empire.

ROAD TO BREAD—See Under Contract.

The Board of Supervisors, on Wednesday, opened the bids for building a road from Prescott to Bradshaw City, and let a contract to James Patterson to build sections B, C, D, and so on of P. as his north of the head of Battle Flat, according to survey and specifications on file, for the sum of \$32,000, his being the lowest bid. All other bids were rejected.

This places the road at a contract from Prescott to Battle Flat, say 25 miles, and as no work will be required except the flat, and but little down Bear Creek to the mouth of War Eagle Gulch, and as the P. Co. company are building a road down from the mine to that point, and as they have already built a good lumber towards the War Eagle and Delaney mines, the road is practically under contract to within sight of Bradshaw City at the old War Eagle.

If we remember rightly the law requires the road to be built by the first of January, and when completed will be the last investment that Yavapai county has ever made. The Carthage will be paying and all that, but this road will be worth more to Prescott, and than a dozen Courthouse and jails.

THE INDIAN AT THE

At last accounts Gen. Howard had met a small band of Indians and engaged a "Saw" battle, the Indians killing one of his men, and capturing two of his horses. In every instance thus far the Indians have been victorious in their engagements with Howard, but with Gibson's aid, to the contrary. Although the loss in killed and wounded of the troops engaged in the Gibson fight was considerable, the Indians were dealt a heavy blow, and may have been exterminated.

Arrest of J. A. Lewis.

Yesterday we noted the fact that J. A. Lewis, the Contractor, had been indicted by the Grand Jury on a charge of murdering his wife, and that having made his escape was being pursued by a number of officers. The first news we heard on the streets of this morning was that he had been caught, and was in jail. It seems that among other precautions taken by the Sheriff was to deputize W. N. Tolman and Chas. E. Frederick, who were starting to the San Francisco Mountains on a hunt, so that in case they came across him they might scoop him in.

They encountered last night at Ike Skilling's ranch, some eighteen miles below town, and between 9 and 10 o'clock Tolman was down in the bed of the creek and saw a man trying to get to the well. He immediately went to camp and told Frederick and Skilling what he had seen, when Skilling got his horse and a revolver and went after him, overtaking him some two miles below, when he saw the man, and he and Skilling went into camp, where it proved to be Lewis. Frederick and Tolman then made a bed in the wagon, put him in and required him to lie still. Tolman drove and Frederick held his shotgun on him all the way to town, where they arrived at quarter past 3 o'clock this morning, and delivered him to the Sheriff. Lewis was searched, and no arms, no money, no papers, and no other valuables were found on him. Subsequently, however, twenty-three twenty dollar bills were found in his sleeve, making \$500 in all. He was in his shirt sleeves, and had nothing with him but two biscuits. When Skilling took him he offered him \$500 to let him go, and on the way up Skilling overtook them near the Point of Rocks, and several times Lewis said to Frederick that he would give him everything he had in the world if he would let him go. He said he had no fear of the rifle, but was afraid if he attempted to escape Frederick would take him on the wing with the shot gun. Frederick had put a handful of BB shot in each barrel and it was doubtless a wise conclusion not to do it.

We hear that he made arrangements with a friend to meet him at the post office, east of town, with a horse, clothes, arms, provisions etc., hence the fact of his being taken out there. It is also reported that he was traveling in the mountains, but the Sheriff's dog, and blocked that part of the game. Whether he shall prove to be innocent or guilty on the final trial, one thing is certainly true, and that is, that he has acted foolishly. He should have either sold his trial and made the best case for himself, or he should have waited until the Grand Jury was ready to bring in an indictment before attempting to make his escape.

ARIZONA MINES.

During the last ten days many very valuable mines have been discovered by the prospectors in the various districts. One is being taken from the Perry mine, Hassayampa district, a new find, which is really marvellous in richness, assaying thousands of dollars to the ton. The richest of the ore is being sacked preparatory to shipping it to San Francisco for sale. A tunnel is being run into the side of the mountain which will strike the lead 150 feet under ground, when the owners will realize that they have a bonanza mine. It is reported that the Perry mine, which is owned by the Perry family, is the richest of the kind ever found in the Territory. The Perry family has been working the mine for many years, and has been successful in finding many valuable mines. The Perry family is now working the mine, and is expected to make a large profit from it.

In the Globe, ore continues to be found equally rich with those found in the Elbert at White Pine a few years since; much of it will yield \$20,000 to the ton. Pima county is booming up, and the interest taken in her by capitalists from all sections who are willing and anxious to invest in the rich silver deposits that abound in great numbers within her borders is evidence conclusive to the unprejudiced, that Southern Arizona is unsurpassed in mineral wealth. The same can be said of Mojave county, with her famous McCrackin, Hope, Keystone, Hackberry and the large number of other excellent mining properties scattered here and there in every nook and corner from the line of Yavapai to the Colorado. Quartz mills are going up like magic, and within 60 days the shipments from that county alone will surprise the outside world.

One hundred and twelve thousand pounds of machinery, being part of a ten-stamp quartz mill, were shipped last week by D. S. Seahr, per steamer of Bash, Anabasis, A. Contreras, Perez, Arujo and Mendoza. This machinery was consigned to White & Allen, Globe district, in Pinal County, but as W. & A. are only contractors for erecting mills, we guess the truck belongs to the Miami or one of the other flourishing companies in that district. Mr. Seahr is himself a first class engineer, and he pronounces the engine and all the machinery to be brand new, and of best quality made. It was all landed and loaded on to the teams down below the Quartermaster's depot, being too heavy to pull over the spur track across the foot of Main street.—Yuma Sentinel.

Quicksilver goes past Yuma to Prescott in surprising quantities. The bullion shipments from that section are large, but the shipments known to the public for the past year have borne no proportion to the amount of quicksilver shipped up there.—Yuma Sentinel.

The Western Union and the Atlantic and Pacific Telegraph Companies have finally consolidated their business and fixed on a tariff said to be satisfactory to the two lines. The public may now expect another monopoly in telegraphy. The Western Union Military line in Arizona which cannot be broken by either of said companies would be in a sorry plight and still the Yuma Sentinel advocates the pulling down of this line to give the monopolists a fair show to stick their claws into our flesh deep.

Capt. Paul Boyton.

The Kansas City Mo., Times of Aug. 17th has a letter from Capt. Paul Boyton, the well-known swimmer and inventor of life-saving suits. He writes from Dijon, France, July 18th. He is now eastward bound on his way "round the world." Capt. Boyton is a cousin to our townsmen, J. H. Boyton, hence the particular interest in his name and exploits have for Prescott people. Within the past few years he has not only swam the English Channel but given exhibitions of his prowess, and the utility of his invention before all the crowned heads of Europe. He now goes to India, Australia, China and Japan, thence to the United States, when he promises his Missouri relations a visit. Arizona is not an inviting field for a man who makes swimming a profession, therefore his Arizona cousin, J. H. and Price will hardly be able to induce him to come this way and give one of his shows in Granite creek.

The great difference between the temperature of the days and nights in this altitude and latitude might furnish a reason for the prevalence of sickness this season, if the same difference had not existed for ever, and it has always been extremely healthy until now.

The thermometer, which always indicates a temperature as low as forty at night, is apt to crawl up to the neighborhood of a hundred at mid-day, making a difference, in about five or six hours, of sixty degrees.

The cause of the sickness will have to be sought for elsewhere. Many have supposed it to be owing to the poisonous minerals held in solution in the water we drink, which as the quantity of water is reduced by evaporation during the hot, dry weather, would give a greater proportion of mineral to a given quantity of water; but if this were true, the question arises why has it always been healthy hitherto when the seasons have been dry?

If anyone asks if it is so sickly this year, it will probably be the safest to say that you don't know.

SCIENTISTS ON A PROSPECTING TOUR.—A party of eminent scientists comprising Sir Joseph D. Hooker and Lieutenant General Richard Starchey, of England; Professor Joseph Leidy, of Philadelphia; Professor Hayden of Washington and Dr. R. H. Lomb, of Philadelphia, will arrive in this city in a few days. These gentlemen have made extended examinations and notes in Kansas, Colorado and Wyoming, and are now making examinations in Nevada. After a short stay in San Francisco, it is their intention to visit as many important localities in this state as they time will permit.—S. P. Call.

HELENA MONTANA, August 14.—The following is just received from Bannock: The Indians crossed at the head of Home Prairie to Lemhi, striking Stephenson's train en route. They are evidently making their way to Snake River Valley.

The Times Chicago special says: Delegate Magnifico, of Montana, sends a message, in which he says that he has attacked 350 warriors and killed 150. He did not lose a gun or wagon, and the Indians got severe punishment in the hardest fought battle of the war.

Hearing that an expedition has been organized for the purpose of painting quick machine guns all over the majestic scenery of the mountains and plains, the Springfield Republican becomes unreasonably incensed. It says that though naturally of the most humane disposition, it sincerely hopes that these depredations of nature may fall into the hands of Sitting Bull, Chief Joseph and the dreamer Smokehouse, or any other chief, and be tamely accepted, so as to be burned at the stake. New York is the only State, it states, that has a law by which those outrages against good taste can be punished.

Omaha has a topic of interest just now in the freaks of the Missouri River. The Union Pacific R.R. shops, and Omaha Steaming Works are endangered by the washing away of the bank near which they stand. A large force of men and teams are kept at work, and the intention is to have them work at night as well as day—cutting and building willows and filling sacks with stones to settle in the river against the bank which is being washed away. The way these new, two-bushel grain sacks are being thrown into the river is rather saddening to farmers.

Good Fido.—Yesterday's mail brought cheerful news to an inmate of the guard house at Fort Whipple. A soldier named Ritz, who is expiating some minor offense in the Post prison, received a letter through Capt. Simpson, Post Quartermaster, informing him that an estate in Germany, which has long been in litigation, has now finally settled in his favor, and he has been deposited in bank subject to his order.

Such a letter was quite welcome, of course, and was excellent company for a man that must have been lonely in the guard house.

Pleasant Valley, I. T. Aug. 16th.—A large party of Indians crossed the stage road going east towards Henry's Lake this afternoon, about twenty-five miles south of this place, supposed to be hostiles. They did no harm to anyone. The stage cannot pass tonight, and we think it is best to wait tomorrow. Had to desert Horse in the Pecos stage station, but got the horses away. Have sent a messenger to General Howard, who is camped at Red Rock station, forty miles north of here.

Fort Hall Agency (Idaho), Aug. 16th.—At a council held here today by the commanding officer at Fort Hall and Agent Dr. Johnson with the head men of the Bannocks, many young Bannocks signified a willingness to enlist as scouts and fight the Nez Percés, who are their natural enemies. This is considered favorable for the Bannocks, and dispels all fears of their becoming hostile.

The President has approved the sentence of the court-martial of Captain James H. Stewart and Captain John W. Eyles, both of the Fifteenth Infantry. They were tried at Santa Fe last month—Stewart for drunkenness and Eyles for trying to corrupt a counsel of the administration. Stewart is from Nevada, and was Captain in a California volunteer regiment during the war.

Gen. Howard is just where he has been for the last two months, three days in the rear of Joseph's band of Nez Percés. He never will be any nearer in our judgment.

THE TERRITORIES.—Bathing in Great Salt Lake is said to cure all skin diseases, sore eyes and catarrhs. Hundreds are daily testing its efficacy at Lake City.

The Washington Territory potatoes are less seriously blighted than in the past four years, but the cut worm is stripping the fields bare in many directions, and threatening to do worse.

The Salt Lake Tribune says: "A new mining district of great promise is opening up north-west of Evanston. One hundred miles are already on the ground, and the ledge has been traced for a distance twelve miles. Ore assaying \$2,000 in silver and \$80 in gold is the latest find in the district."

VICTORIA, August 13.—The Roman Catholic Church in this city was broken into last night and robbed of a silver chalice, candlesticks, etc.

The steamer Dakota called for San Francisco on Friday with forty passengers and \$90,000 in treasure.

DENVER AND RIO GRANDE RAILWAY.

The Denver and Rio Grande Railway Company has an advertisement in the MINER to-day. They have just completed their road over the Sagrado-Chloris range of the Rocky Mountains, at an elevation of 9,339 feet, to Fort Garland, in San Luis Valley, and now propose to offer inducements in the way of low freight rates to the people of Arizona to patronize them. The Kansas Pacific has an advertisement in another column, and this gives still another outlet and outlet to our trade.

All that is needed is for some one of our merchants to break the way and the rest will be obliged to follow, then we shall have goods laid down here at a cost so little above San Francisco wholesale prices that we shall hear no more of the ruinous rates people have to pay for the necessities of life.

The present terminus at Fort Garland is in Colorado, but it is very near the line of New Mexico, and not a great way from the N. E. corner of Arizona. The distance is considerable, yet it is true, to transport freight by wagons, but a majority of the road is excellent, and well adapted for oxen, which can find abundant natural feed and plenty of water, which under the New Mexican system of freighting, will bring the price of goods paid down to about the rates that have to be paid for half the distance where teams have to be fed grain. Then again, when the owners of the railroad see that they have something to hope from Arizona, they will, of course, keep extending their road in this direction, shortening the gap, quickening the time and cheapening the rate.

This company seems to have but just waked up to the fact that there is a country south and west of Fort Garland that is worthy of their attention, and although they have no scientific data to go upon, never having sent their civil engineers to survey the route, they still seem to know the facts to be, and are determined to profit by such knowledge.

All the surveys and projected routes, as delineated on the maps sent out by the Kansas Pacific show that they had no better conception of the lay of the country than to suppose the Rio Grande river to be about all there was of New Mexico, and the only way to reach the waters of the Colorado of the West, of the Pacific Ocean, was by way of San Domingos or San Pedro, and in order to strike the waters of these streams have surveyed, as the red lines on the maps show, all around Robin Hood's-burn, and left themselves floundering back to the Colorado, after having nearly surrounded that outlet to the sea. They now want to see the water, and are feeling their way westward from Fort Garland, on a survey to the very heart of Arizona, and are going to the water at either one of half a dozen good harbors.

A dispatch received at London from the Viceroy of India, dated August 15th, states that the general improvement in the crop prospects in Madras, Mysore, Bombay and the northwest was maintained the past week. Rain is still needed in the Punjab, Rajasthan and the western part of the northwest provinces. Prices of grain continue exceedingly high throughout the country, but in Madras they are slightly easier than the week preceding, and still in the upward part of the scale. The price of rice in Madras and Mysore is still high. Important in the opinion of the grain, stock and supplies continues to cause anxiety. The grain trade at Calcutta is exceedingly active. Ninety thousand tons of shipping are engaged. The condition of Mysore continues critical. The Governor of Bengal telegraphs concerning the condition of Bombay, that the prices of grain are slightly easier, but still high. Important in the opinion of the grain, stock and supplies continues to cause anxiety. The grain trade at Calcutta is exceedingly active. Ninety thousand tons of shipping are engaged. The condition of Mysore continues critical. The Governor of Bengal telegraphs concerning the condition of Bombay, that the prices of grain are slightly easier, but still high. Important in the opinion of the grain, stock and supplies continues to cause anxiety. The grain trade at Calcutta is exceedingly active. Ninety thousand tons of shipping are engaged.
